AutoCAD and the Autodesk Exchange Apps are designed to work together. So for example, if you are designing a new program or piece of equipment, you can share your design with AutoCAD and at the same time post it to the Exchange apps. You can then use the Exchange apps to try it out, share it with others, and perhaps even sell it. Users may be able to send simple drawings (plan, section, elevation, etc.) to others. More complex drawings could be sent to a 3D-printer, for example. When using the 2010 version of AutoCAD, one can now import files into an AutoCAD drawing from Microsoft Word, Excel, or Apple Numbers.
