Typical users of AutoCAD and AutoCAD LT are contractors, architects, and industrial designers. AutoCAD is also used by architects, interior designers, engineers, electricians, plumbers, and other contractors, and construction and design firms in manufacturing. In late 2015, the AutoCAD application was rebranded as AutoCAD 360 and renamed AutoCAD Design 360. History of AutoCAD AutoCAD, introduced in December 1982, was developed by Paul Ricci and Doug Gantenbein, who were working at the Rocky Mountain Research Laboratory at the time. The first version of AutoCAD, which was built from the ground up by these two men, only supported black and white 2D drawings. In the years that followed, the software was purchased by Digital, then by On-line, and later acquired by Autodesk in 1994. AutoCAD started as a commercial product that was available only to firms on high-end mainframe computers. In the mid-1980s, however, after the release of early versions of Mac, PC and Windows, computer technology became more widespread, and AutoCAD was released for personal computers (PCs), both as a standalone product and as a plug-in for the Apple Macintosh version of Microsoft's Basic for Macintosh program. In 1993, when Apple introduced the Mac version of MacDraw, a competitor to AutoCAD, Autodesk acquired it and released AutoCAD for Mac. Autodesk also released AutoCAD for Windows, which allowed users to design from a mouse, and AutoCAD LT, which allowed users to design and make 2D drawings without a mouse. The software was also ported to the DEC VAX and IBM PS/2 computers, and was then ported to the Amiga, Apple IIGS and IBM-compatible PCs. In 1995, Autodesk released
