Adding notes and creating checklists. Creating comments and questions. Addition of line notes. Addition of freehand notes. You can also share feedback with your team on the web. Another new feature is that you can share the drawings you have prepared as digital workflows, including a "feedback-rich" presentation of your design, and the associated markup. Use the new Markup Viewer (video: 14:12 min.) to examine the files you've created with various markup techniques. Work with existing files, and add your own markup. Simplified Filters: Make your workflows more powerful with more streamlined interaction with the filters. You can add a filter to your AutoCAD drawing and search within that drawing for the objects that meet the criteria you've set. The filter window can be opened by clicking on the Filter button in the upper-right corner of the Filters dialog box. Use the Filters dialog box to specify criteria for your drawing.
