What's New In?

BYclouder Office Document Recovery is a useful application that was especially tailored for data restoring operations. The program is able to scan several device types and restore the supported file types to a location you choose. BYclouder Office Document Recovery uses a wizard-like interface so everything will be very easy to configure and use. BYclouder Office Document Recovery description This package contains prerequisites required to run BYclouder Office Document Recovery. The BYclouder Office Document Recovery setup package is a complete and easy-to-use application. Even if you do not have any experience with tools like this, you will find this program really easy to use because all the steps will be clearly displayed for you. You can start with the custom scan and recover process using the wizard interface, after which you are free to decide what other steps you want to take as well. The BYclouder Office Document Recovery setup package is available for free, and it is fully compatible with Windows XP, Windows Vista, Windows 7, Windows 8, Windows 10, Windows Server 2008, Windows Server 2012, Windows Server 2012 R2, Windows Server 2016, Windows Server 2019. If your device is detected by the application, you will see the following screen as the BYclouder Office Document Recovery app main interface appears on your computer desktop: In the BYclouder Office Document Recovery main interface you will find two tabs on top: a) "Scanned Devices" - they are the files and folders that have been scanned, and b) "Recovered devices" - those files and folders that have been restored to a

specific folder. The top main interface of the application is the “Recover Manager” main window, which displays the full structure of the selected files and folders. Users are not limited to check only single file types - they are able to choose the type of data they want to restore by using the “File type” drop-down box. If you want the program to scan your devices, follow the instructions below:

1. Run BYclouder Office Document Recovery: 1. Click the “Start” button. 2. Select the program’s EXE file by clicking its shortcut in the start menu. 3. Click “Open” when you are asked for confirmation. A file scan will begin immediately.
2. Select what you
