Kit is a community to recommend and find the best products for new activities and experiences. âžžïï, http://bit.ly/kit-app Find this Pin and more on What to read? user Maxim Fedorov. tags For those who hate to cook or who always have no time. Breakfast In the morning there is always no time to cook, but breakfast should not be skipped. Here are a few ideas on how you can quickly refresh yourself to get energy for the entire first half of the day. 1. Dried Fruit Oatmeal Heat 1â„2 liters of milk in a small saucepan. Add 6 tablespoons of oatmeal and cook over medium heat until simmering.

A: The black characters in line 34 are a result of some sort of data corruption. It looks like a sharp character, but it is actually a short dash character. It's possible that the characters came from a PDF that was being inserted into your document, and the program didn't know how to interpret it. The easy way to fix it: re-open the file in Microsoft Word and do a Save As "plain text". The other way is to use hex editor to remove the line 34. the stochastic threshold of each ϵ_i defines the optimal strategy. Hence, β_i^* for all i have one and the same value, and the value of this common value is the optimal estimate. In the presence of noise, any finite value of the noise may cause deviation from this optimal strategy, but this deviation is made up by the optimal estimation procedure. SUMMARY ===== In this paper we have shown how one can estimate a single parameter from the statistics of multiple records of a random process generated by a stochastic system. In particular, we have shown how one can in principle achieve an optimal sensitivity per unit cost by use of a threshold which depends on the parameter. [10]{} P. W. Anderson and G. Brinkman.
