Rise and be Tarnished. Rise and be Tarnished is a fantasy action RPG with a medieval setting that allows you to freely develop your character. In the game, you can freely customize your character's appearance and skills by combining equipment and weapons to find and create your unique, powerful Tarnished Lord. In Rise and be Tarnished, you can freely develop your character by combining equipment, and you can equip weapons and armor that change your performance and increase your muscle strength to become a strong Tarnished Lord.

- Players Who Want to Fight Together and Play Together. Rise and be Tarnished is a fantasy action RPG with a medieval setting. In Rise and be Tarnished, you can freely develop your character by combining equipment, and you can equip weapons and armor that change your performance and increase your muscle strength to become a strong Tarnished Lord.
- A Unique Online Play Experience Through an online element, characters can be kept even in places where they can not actually meet. Since your character can be seen by others, you can communicate with them and join hands with other players in the Kingdom of Ariel to battle against the evil lords from other dimensions.
- A Vast World Full of Excitement A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. As you explore, the joy of discovering unknown and overwhelming threats await you, leading to a high sense of accomplishment.
- Create your Own Character In addition to customizing the appearance of your character, you can freely combine the weapons, armor, and magic that you equip. You can develop your character according to your play style, such as increasing your muscle strength to become a strong warrior, or mastering magic.
- An Epic Drama Born from a Myth A multilayered story told in fragments. An epic drama in which the various thoughts

User Reviews Overall: I read some negative reviews and one positive review of Dawn Of Fantasy saying this game was similar to Dark Souls and having a big impact on its sales. I personally don't agree with both of those reviews. I've played both Dark Souls and Dawn Of Fantasy and this game is quite different than both of

them. That said, this game is very rewarding and fun to play. The combat is intense, the world is varied and complex, the weapons are satisfying to use and it has many interesting twists and turns. It's just a really fun game that you won't be disappointed with if you give it a shot. 10/10 Gameplay: 10/10 Visuals/Audio: 10/10 Replayability: 10/10 Bugs/Glitches: 0 Overall: 10/10 Story: 6/10 Really simple story and a lot of characters that aren't all that interesting and I feel like they could have been a lot better. The story isn't bad but it's very simple and a lot of the characters don't even know what the game is about. It's kind of like a Mario game where none of the characters are really good and are only there for the story. 6/10 Final Score: 7.5/10 8/10 Overall: 8/10 Gameplay: 10/10 Visuals/Audio: 10/10 Replayability: 10/10 Bugs/Glitches: 0 Story: 6/10 Really simple story and a lot of characters that aren't all that interesting and I feel like they could have been a lot better. The story isn't bad but it's very simple and a lot of the characters don't even know what the game is about. It's kind of like a Mario game where none of the characters are really good and are only there for the story. Final Score: 7.5/10 Overall: It's not a perfect game by any means but I have to admit that it's a very good game. My favorite character is Aia and she has a great story and she plays very well. I don't want to say much more because I don't want to give away any spoilers but I will say that it's a RPG that takes a lot of strategy and some luck to get through. If you enjoy RPGs and you have a bit of patience you'll love this game. Gameplay

**Q: Qt/C++ passing string output I am trying to create a method in Qt that will be used to pass a QString to another method in order to display the string inside a GUI. Is it possible to return a string that is used to output a new GUI for example? This is what i tried to do: QString Update(QString &path){ path = QString("path.txt"); return path; } QString update(QString &path){ QString words = ""; for(int i = 0; i length(); i++) { words += path->at(i); } return words; } A: You can achieve the same effect with following code : QString Update(QString &path){ QString returnString("path.txt"); return returnString; } There is no need to return a copy of the string, as the string is a copy itself.
