No more dreaded “gyro drift” In previous FIFA titles, gyroscope data was acquired from users holding the controller in their hands, and the hardware would compensate for slight drift when the controller was moved or tilted. However, in FIFA 22, this is no longer the case. With an ultra-accurate physics engine, the game features a different ball physics model designed to work for any type of player, without the need to compensate for drift. Improved game physics also see players better read the game by reacting more naturally to the opposition’s positioning and movements. Improved artificial intelligence The FIFA ULTRA Team AI system has also been updated, with a set of new AI routines that analyse and exploit the differences between different teams and players. Players are now better able to anticipate the opposing team’s team-play structures and movements and react accordingly. Better tackling and ball control techniques are displayed, and defenders are more aware of the timing of their opponent’s runs and passes. Maximising power In addition to a number of powerful new player-styles, the game introduces “Discover”, a feature that allows players to customise their player throughout gameplay, unlocking new abilities, as well as a new gameplay control mode, “Exclusive,” which gives players the freedom to work in different, more experimental ways with the ball. Teams also have the ability to customise their own play styles, and can more easily choose how they play football, with new intuitive coaching options, including one that allows players to rotate their game and control players’ movements using the touchscreen. What’s new in the demo? Sega invited me to the Square Enix event in which FIFA 21 revealed their new football game, and a demo was available to play. I spent my time with the demo playing Ultimate Team mode, the newest mode in FIFA that allows you to build and manage a squad of real players, and I’ve seen it live before, but what if I say I actually got to play it with FIFA 22? FIFA 22 build 34-early I played Ultimate Team mode with my virtual, man-in-a-suit, FIFA 22 player, and it was everything I dreamed about FIFA. The new engine is a beast, and is really well-made. The pitch hasn’t been hurt yet, and the ball’s flight is sil

Forge your dream team as you compete against players from around the world in the Ultimate Team modes. Available as separate games or as a part of the Ultimate Team Day Pass, lead the team to glory, compete in a daily draft challenge, compete online in the official FIFA Rivals mode, or compete in a variety of FIFA Ultimate Team leagues all in FIFA Ultimate Team. New Ways to Play - FIFA 21 brings to the pitch new ways to play, across both offense and defense. Shot Intelligence - Players can now read the game around them, anticipating where and when to make a move before the ball arrives. FIFA 21 comes with brand new "xG" (Expected Goals) technology, where the game predicts where a shot will go, and tells you if the shot is going to be scored, saved, or blocked. New Dynamic Referee AI - Sensing where the ball is heading, and adapting to game situations, referees in FIFA 21 will no longer make the same calls over and over again. This gives players and coaches the ability to adapt to situations on the pitch and turn game momentum in their favour. New Intuitive User Interfaces - FIFA 21 comes with a brand-new user interface, that is easier to navigate, easier to understand, and that provides players with a more fluid and intuitive way to control and interact with the game. Multi Touch Controls - FIFA 21 brings the classic, intuitive controls of the series back to the game. Users can now use both the right stick to play as a defender or a midfielder, and the left stick to pass or shoot. Enhanced Edge of the Stadium - New wall takedowns and sliders give players the control and confidence to control the pitch. Visual Impact - Improved ball physics give players more control over the ball during and after kicks. Players will now have a greater sense of control over the ball, and have more freedom of movement than ever before. The FIFA Team - FIFA 21 features the most complete lineup of players ever in a sports video game. Combine that with the new shots, dribbles, and skill animations, and you've got a game that is more realistic than ever. Every One of the Players - In total, 27 teams from over 40 leagues are included in FIFA 21. These include Barcelona, Manchester City, Manchester United, Real Madrid, Chelsea, Paris Saint-Germain, Juventus, Manchester United, Liverpool, Bayern Munich, Borussia Dortmund, and more.

... LOADER! LOADER! LOADER! Previews... there's lots! But you can't just preview some of these big, new features (translation: big-ass screenshots). But you can find them in the magazines and preview articles at the end. We open with a pretty obvious one. Update as of October 10th, 2015: This version of iOS 9.3.2 includes both performance and stability fixes. And yes, it's that critical. If you didn't already know When you're cruising the mall, trying to decide between a really awesome \$2,900 waterfall kitchen, or a \$1,200 Microsoft Surface for your favorite sequel, Lifehacker Update as of October 9th, 2015: According to a report from Tomsguide, Android N is possible; a pre-release version may launch soon and, if true, includes changes that could hint at the next version of Android. The last time Apple demoed iOS 9 on stage, we found it to be more barren than ever: The And below are all the issues we identified with iOS 9.3.1 that It's been over five years and two months since Keiths last update. I figured it was about time I finished the site and put up a new post. Between 2011 and 2015 this site just didn't get the attention it needed. I think it has to do with the fact that gaming is pretty much everywhere these days. I'm sure some of you are thinking "Keith! Why didn't you just start another site to cover video games?" Well, it's harder than it seems. It still takes a
