I installed iTunes on my new Windows 8.1 laptop, but I can't open iTunes from the.Q: This key is not signed by a certificate from Apple I have an iOS app and it has been rejected from the app store because of this error. This is the error message: Rejected: The binary you submit contains code that attempts to establish a network connection on the main thread. Network connections are subject to an OS-level firewall and are highly discouraged, as your app will be rejected from the App Store. I just see that I am making a single request to the server. Any ideas? EDIT: I had setup a debug build that is configured with different development profile Development Build: Deployment Build: A: The problem is that your app crashes on the simulator or a device when it tries to establish the network. Read this SO link for answers: iOS error: Could not establish secure connection to iTunes Store This subproject is one of many research subprojects utilizing the resources provided by a Center grant funded by NIH/NCRR. The subproject and investigator (PI) may have received primary funding from another NIH source, and thus could be represented in other CRISP entries. The institution listed is for the Center, which is not necessarily the institution for the investigator. It is important to understand the light absorption and scattering properties of soft tissues and their changes under different physiological conditions. Optical methods can provide real time measurements of these processes, which are important for diagnosis of disease. One such method is diffuse reflectance spectroscopy, which measures the absorption spectra of a tissue over a wide range of optical wavelengths, such as from 300 nm to 1100 nm, and can be used c6a93da74d
