Ratings Details LittleFunny MP3 Player is a small and practical program created to provide simple means to listen to your preferred playlists and songs easy and effortlessly. Its main purpose is to offer help in creating custom track lists with an unlimited number of files, while playing your favorite tunes. The installation is finished before you realize and proves to be uncomplicated. It's wrapped in an intuitive and user-friendly layout similar to WinAmp with a playlist that can be hidden and a small panel that includes the playback commands. Populate your database with different songs The tool supports only MP3 and WAV formats and saves the list in WFP type. If you don't have an existing file stored on the hard drive, you can compose one by adding multiple tracks into the panel using the explorer. The items are only displayed with their destination path, instead of the usual method most player adopt. LittleFunny MP3 Player comes with playback controls that let you play, pause and stop the record at any given time, as well as easily go back to the previous song or the skip to the next one. Tweak the volume along with the song speed and balance You have the option to adjust the sound by dragging the little bar to the desired value, select the singing speed from slow, normal or fast, and choose where the sound should be heard. Unfortunately, you can't resize the panel as it proves to be too small especially for larger monitors, and it doesn't come with an

Simplify your daily usage of Macintosh or Windows by creating your own macros to perform several tasks you'd otherwise have to repeat time after time. KEYMACRO lets you create your own recording templates, like loops, chords, and backing tracks. Its high-quality instruments sound like a keyboard, drum machine, or any of the other instruments available, and many sound effects are included. KEYMACRO was designed to be used with a keyboard. However, you can also use it with a MIDI controller, such as a USB or FireWire input device. Select a Recording Template KEYMACRO's templates are already customized for the most common recording needs. You can select the one you prefer and then click "Recording" to have a new recording track created. The presets use instruments and different effects to create a variety of tracks. For example, you can use the Bass Loop 1 with its Bass line, Cymbals, Snare 1, and Kick to create an inspiring Drum track. Key in a Recording Once you record the track, you can adjust it and save it as a new template. Then, you can use it as many times as you want. The VST format is compatible with Windows and macOS, and can be used in any audio and video editor. To record an audio track, simply click on the record button, select your microphone, and click stop. Edit a Recording KEYMACRO also comes with a full editor that you can use to edit an existing recording. You can adjust its tempo, pitch, volume, and playback speed. Export a Recording KEYMACRO lets you export the recording as a MP3, WAV, Ogg Vorbis, WAV, WMA, MPEG, Apple Lossless, AAC, MP3, or M4A audio format file, or as MIDI. You can then import it into any audio or video editor. You can also export it as a VST (Windows) or AU (Mac) audio file to any audio editor. Ripping CD's with Rhythmbox KEYMACRO's Rhythmbox plugin is designed to be used with its own templates. It can create a CD from MP3, WAV, and Ogg Vorbis file formats, and you can also rip a CD into a file of any type, including WAV, WMA, MPEG, Apple Lossless, AAC, MP3, and M4A. Imports and Exports You can import or export files using 2edc1e01e8
