Robert B. Jansen Robert Bertram Jansen (April 19, 1901 – October 16, 1986) was an American mechanical engineer and inventor, noted for designing the earliest commercially successful zippered aircraft safety vest. Biography Jansen was born to Bert Jansen and Caroline Olive on April 19, 1901 in Albany, New York. In 1930 he graduated with an engineering degree from the Polytechnic Institute of New York. He was appointed as mechanical engineer in charge of the Ames department of the California Company for Aircraft Maintenance, a manufacturer of industrial and commercial aircraft. He moved to the US Army Air Corps following the attack on Pearl Harbor, where he served as a production engineer. He left the Army in 1946 after being diagnosed with chronic spinal osteoarthritis. He settled in England in 1948 where he began working for Hatfield Aircraft Limited, designing the Hatfield P-52 trainer. He retired from the company in 1964. During World War II he developed an early prototype of a zippered safety vest for pilots, which he patented in 1947. The vest was initially used by Fairey Gyronites carrying out aerial refuelling operations in the UK and North America during the late 1940s. From 1952 to 1953 he worked at the Cranfield Institute as director of research and development. In 1968 he received a Doctor of Science degree from the University of Bedfordshire. Jansen designed several aircraft in his retirement, including the Piper PA-31 J2 Cub. He married Elfrida "Joan" Meyer on July 2, 1935, with whom he had three children. He died on October 16, 1986. The Overlooked Health Benefit of a Vegetable Diet Low-carb diets often mean “carb-free.” Such a model was responsible for cutting a significant number of Americans from having diabetes to the current 4.6 percent of the population. The authors suggested that the clinical community had been slow to adapt to that body of evidence, but the prevalence of diabetes has actually been growing steadily since the early 2000s. What, then, of the favorable effects of a low-carbohydrate diet on health as a whole? Nutrition Week and several publications have recently featured articles comparing the overabundant and often-unnecessary fat, sugar, and starch consumption of typical American diets with the much more healthful intake of the Mediterranean diet. These articles highlight the wide range of health benefits related to this particular diet. There are also important shortcomings to consider. First and foremost, it’s not a diet but a lifestyle. Diet is a physiological and practical term meant to convey a plan of eating in a particular manner. Lifestyle encompasses the full range of behaviors and activities in which a person engages. For example, playing sports and pursuing scientific knowledge qualify as lifestyle, as does one’s major course of action in the modern world—all are part of one’s lifestyle. In spite of many analysts’ reluctance to do so, the Mediterranean diet is more than a diet—it is a practice. But how much exercise does it take? How much rest? Diet can be an excellent way to eat or eat better if what and how you eat are in accord with one’s lifestyle. It’s a lot to keep in mind. Exercise and lifestyle A modest degree of exercise can have an d0c515b9f4

Get access to a bigger library of favorites: It was 15 years ago today that I was surfing the net for the first time, and clicked on a website which began a journey which has never ended. The site was called smile.asia and as I scrolled down the page, I came across this: It would be a total of 15 years before I surfed the net regularly again. Back then I never imagined what I was to be up against. But what the hell? Who cares? I will give it my best shot. I started to learn in Dutch, then in English and Chinese. I started visiting the forums and I was slowly becoming more and more immersed in this huge new world. Over time the community of forums grew and grew, and new groups were added, and the group of forums grew. Some of the moderators I became friends with. And my English got better and better, till it reached a point where I started to understand (most of) the discussions, and it was fun for me to try and correct people if they made mistakes. I was not to know that I would be on the scene for 15 years. The first year of freedom of expressing myself and being happy about my chosen path, I would be back in the US, frustrated, tired, in a quand
