

song Indian muslim Muslim songs Lyrics and Videos . 1. Deposed Mussolini and his ministers were not tried for the charge of war crimes. 2. The definition of War Crimes cannot be changed by the US to include COIN of COIN. 3. Yes, there was a Nuremburg decision about the prosecution of German soldiers for war crimes, but those were procedures under the Hague Convention of Nuremburg. The US is not bound by that decision. The US did however, agree to submit to international jurisdiction concerning War Crimes, which we have not yet seen. The argument that the US is not bound is like saying that the UK is not bound by the AGW decision. 4. The US refusal to submit to international jurisdiction of War Crimes is one reason why the victims of 9-11 were not prosecuted as were the victims of Nuremburg. 5. Domestic law does not have to be as the UK and the UK Government, in this case, have decided. If the US Government decided that they did not want to prosecute COIN, the US Government can make that decision. This is what Cheney does when he says, "You can't prosecute that." This is the same argument Obama makes in evading prosecution of COIN. Effects of azelastine on ovalbumin-induced bronchial hyperresponsiveness and airway inflammation in house-dust mite-sensitized BALB/c mice. Azelastine, a second-generation anti-histamine agent, has been reported to inhibit mast cell mediator release by blocking the effects of IgE on mast cells. Recent studies have found that airway inflammation and hyperresponsiveness (AHR) in asthmatic patients with high levels of IgE could be controlled by corticosteroids or leukotriene receptor antagonists, but not by anti-IgE treatment alone. We investigated the effects of azelastine on OVA-induced AHR in mice sensitized by house-dust mite (HDM) to the same degree as in humans. Sensitized and unsensitized mice received four intratracheal instillations of OVA/PBS or PBS/PBS 1 week after the last OVA/HDM or PBS/HDM challenge. We found that azelastine (1 or 10mg/kg, i.p.) inhibited AHR in unsensitized mice.
