Possibly one of the most mind-blowing new features from Photoshop for the year ahead is the introduction of Neural Filters. It's actually a new workspace within Photoshop with filters powered by Adobe Sensei. Equipped with simple sliders, you can make magic happen such as changing your subject's expression, age, gaze or pose in the time it takes you to say "AI technology." To access Neural Filters head to Photoshop, and choose Filters > Neural Filters. In 1988, Thomas and John Knoll developed the first basic version of Photoshop. Elements also gives you a new way to describe image adjustments in creative ways: you can add a new tone and describe it, or you can select and copy a color from another image and paste it into yours. You can also make a selection and save it as an adjustment layer, or apply the same duplicate layer adjustments to multiple images, change the opacity, and apply filters to it.

For $99 you can unlock all the professional editing features of Photoshop. According to Adobe, the Elements apps are "a powerful start for experienced photographers who want to enhance their pictures with state-of-the-art photo-editing tools, layer styles, text, and effects. With these apps, you can easily add a special touch to your pictures, even if you have little or no Photoshop knowledge." With these

We recently went on a road trip with my husband (not pictured). What started out as a spontaneous trip turned into an organized road trip. We traveled to two different cities and took over 24,000 photos. If my memory serves me correctly, we probably had about 1200 pictures taken that day. One of the more impressive new capabilities for 2019 just emerged: an expanded way to share. There are now four new ways to share photos online: the easiest way to square a cropped image with its original, display a selection rather than the entire image, and share a photo as an image or in real time. These features are available within the Share tab under the Image menu, which also includes options to share a selection to Twitter, Facebook Messenger, or e-mail.
