Thanks to its popularity, there are, in fact, a lot of Photoshop tutorials out there. But for a novice, the process of sifting through them, especially when the novice is trying to learn Photoshop in the first place, is not a good way to get started learning. See Chapter 5 for an in-depth tutorial on how to use Photoshop for digital painting. Although Photoshop is full of options and features, it's not a tool to learn about features. Learning about features is a process that you work on with all kinds of different software programs, not just Photoshop. And by getting a grip on principles you can easily apply to many different situations, you can simplify the learning process tremendously. In this chapter, I explain some of the basic principles behind this powerful program. ## What Makes This Book So Big? When I first started this book, I was excited about the idea of writing about Photoshop to help you get the most out of this wonderful product. But I realized pretty quickly that I had created a monster. I knew that I needed to write a lot to be able to convey the information. And that kept me going! But then I got bogged down. I kept trying to jam it all into the book, but it didn't feel right. I could tell that I was doing something wrong, but I just couldn't figure out what. My editors kept telling me that I should put things into easy-to-follow sections and go into more depth where it was appropriate. I thought they were nuts, but in the end, I came around to their way of thinking, and I am so glad I did. The final version of this book is going to be organized into the following sections: **Chapter 1: Introduction:** This chapter is a real introduction to the many features of Photoshop. I cover everything from starting a new project to working on image layers. You also find a few key terms that you should know. **Chapter 2: Preparing Your Images:** In this chapter, I give you some simple-to-follow procedures for preparing your images for a variety of jobs. You can use these procedures to get started with just about any kind of image you want to work on in Photoshop. **Chapter 3: Visualizing Your Layers and Images:** I cover how you visualize your images in Photoshop in this chapter. You find out how to set your preferred view, how to view your layers, and how to

FANTASTIC FRIENDS MOST UNIQUE READY, BABY, SHOOT! GETTIN' DOWN If you don't know what Photoshop is then you have no business photographing, designing, drawing or editing anything, and if you do, you can stop what you're doing right now, go to sleep for an extra six hours of sleep and come back refreshed when you wake up. Adobe Photoshop is the most widely used graphics editor in the world, and it's used to manipulate images, create new pictures, design graphics and web pages, and enhance them. Photoshop is the main software used to create images and graphics. Photoshop has been a staple of the software industry since the 1990s and many people use Photoshop to change their photos after they have taken them. Photoshop is the most popular software in the world for graphic design, web design, animation, photo editing and much more. It is a part of Adobe suite, which includes other tools such as: Adobe Acrobat (PDF editing and creation), Adobe Lightroom (photo editing and catalog management), Adobe Creative Cloud (creative tools, multimedia, design, and more) and Adobe Muse (web design and development). One of the best things about Photoshop is that it has a large community of users who are always willing to help others. Some people still use the older version of Photoshop with the older features, but it's much easier to use the newer, updated version of Photoshop (unless you're into retro gaming!) Q: Redux: react-router works on one page, not another I am building a React app with two components, Home and Login. The login component is handled by Redux via thunk action creator. The Home component is rendered by default and renders one of two pages based on user login. I'm experiencing this issue when I attempt to use react-router to link between the two components (Home component renders fine, but navigating to Login redirects to '/' and not '/login'). React Component: React Context Provider: import React, { useState, useEffect } from "react"; import { createStore } from "redux"; import { Provider } from "react-redux"; import thunk from "redux-thunk"; import { RouterContext } from "react-router-dom"; export const Store = createStore(() => ({ })); export const makeStore = (): React.FC => { const store = Store(); return () => { if (!store.dispatch) { return; } store.subscribe(() => { const context = RouterContext({ history: store.history }); store.dispatch({ type: "TODO" }); window.addEventListener("hashchange", e => { const next = e.target.hash.substr(1); store.dispatch({ type
