[Download](#)

How to Download: Download the offline 720p and mp4 files available here.mp4 We recommend Video Downloader.You can download and install it using. 1 Download the Video Downloader and install it 2 Open Video Downloader 3 Click the download button on the main page 4 Enter the link of the file you want to download and select 'Save to disk' 5 The downloaded video will be saved in your download folder by default, you can change the location to any one of your choice. How to Fix: You can see the below comments about the error "Oops! Something went wrong with this code" A: REBUG3553999DGRPS3UPDATPUPPrar...Q: Python quick access to some function How can I get quick access to some function, for example I want to find out whether an argument is an integer or float? def foo(x): ... if is_integer(x) ... elif is_float(x) ... A: in python2.6 and newer: def foo(x): try: is_integer(x) except NameError: is_integer = lambda x: isinstance(x, int) is_float = lambda x: isinstance(x, float) else: is_integer = is_integer is_float = is_float ... A: You can use if isinstance(x, int): A: I usually use a class: class MyClass(object): def __init__(self, thing): self.thing = thing def __call__(self): if isinstance(self.thing, int): self.something() elif isinstance
