Q: a matrix of factorials is symmetric but it is transpose of it is not I am confused by the concept of matrix in mathematics. I do not know if I am correct in my understanding. If I have a matrix of factorials which is symmetric, then it is selfadjoint. But, if we consider the transpose of matrix, it is not.

A: A matrix $A=(a_{ij})$ defines a linear transformation $T:\mathbb{R}^m\rightarrow\mathbb{R}^m$ by $T(x)=(a_{ij}x_i)$. So, if A is symmetric, T is selfadjoint. But transposing A transforms a vector $x=(x_1,\ldots,x_m)$ into $(x_1,\ldots,x_m)^T$, and this is not the same as $T(x)$.

A Metal-Organic Framework (MOF) is a coordination polymer having a three-dimensional network structure in which atoms or molecules are connected by metal-coordinating organic ligands.

The MOF is a special type of coordination polymer. MOFs can be classified into two types according to the type of metal ions used in the MOF. The first type of MOF is represented by MOFs in which Zn, Cd, Ag, Cr, Fe, Co, Mn, Ni, Pb, Mg, W, Pd, V, etc. are used. The second type of MOF is represented by MOFs in which Mg, Al, Zr, Sn, Hf, B, Co, Zn, etc. are used. A metal organic framework (MOF), a class of three-dimensional coordination polymers, is a class of crystalline inorganic-organic hybrid materials of molecular dimension. The MOFs comprise an

Oct 17, 2016 at 8:26 pm placonious · 5,096 points... A truly unique experience and a fantastic example of what can be done with the Unity engine. Oct 17, 2016 at 8:28 pm Caddie · 1,067

points... A perfectly polished action RPG. I haven't gotten a chance to play it much, but from the game's trailer I'd say it seems to have everything I want in a good RPG: customization, powerful items, well-implemented skills, interesting bosses, etc. I'll definitely have to pick this one up. Oct 18, 2016 at 4:09 am v0ky · 6,227 points... One of the best RPGs ever made. I'm not even a fan of the WoW-clones so this is truly unique. I'm still surprised by just how well the game has aged in comparison to other games. Oct 18, 2016 at 10:33 am Nadesus · 7,647 points... There are two ways to play the game: With your comrades, or alone. But the game is full of treasures and companions at each level, so it'll be very hard to play it alone. It's a really fun RPG, with some of the best dialogues ever seen in a game. I felt like it was free, and it didn't bother me at all. It's perfect for solo players with a bit of time. I think Tarnished should be the title for this game. Oct 18, 2016 at 12:16 pm Kikko · 3,826 points... Right away I was drawn into this game. It's a lot of fun to be immersed in a fantasy world, and there's so much to do and discover in this game. Its good to see that the developers are still improving it with a new open-world system, and some interesting additions like familiars (which aren't your companion but will take the place of your current companions). Oct 18, 2016 at 12:16 pm Lego-Man · 5,485 points... They really got everything right. A nice pixel art style, an immersive world and a story that makes you really want to know what happened. I really love that there are a lot of customization options. There are few games that give you that much freedom. bff6bb2d33

Veritas Veritas Veneration Veritas Veritas Veritas Veritas Illustration: Ubisoft Montpellier As the Jesuit missionary, precursor to the University of Paris and today's Pontifical University of Saint Thomas Aquinas (Angelicum), the Franciscan friar and philosopher Tertullian was the first to call himself Christian. But that wasn't the way things were until Roman Emperor Constantine, the empire's first Christian convert, made Christianity the official religion of the Roman world in 313 and transformed the previous monotheistic religions of the cities and later the entire empire into pagan Hellenistic and Gnostic movements. A transformation that all but wiped out the beliefs of Rome's pagan deity Mithras, who is now known only through graffiti and inscriptions.

Kinky boots is running for the Gold Coast as the next Aussie Granny. Members of the national body representing older women's physique and fitness community are beginning to buzz about the potential of the 30-year-old. "We are very excited about the prospect of a women's bodybuilding nation, bodybuilding of any kind, is a great thing," Kinky boots' national manager, Eri van Dijk told The World Today. "The image of a 50-year-old woman lifting a barbell is incredible. I personally would love to see it not just here but anywhere in the world." The bodybuilder, who has been competing in her forties since she was 35, says it should be a "thrill" for anyone as women increasingly lose weight from breast cancer, osteoporosis and menopause. But it should also be a healthy option that doesn't involve the struggle of anorexia. "I suppose for a lot of women it's not healthy or good for their looks to be muscly," Ms van Dijk said. "It's not that they shouldn't feel comfortable [about their body]. But for older ladies it's difficult. "I think we should have a celebration of fitness and a celebration of women's bodybuilding." Older bodybuilders say they are appalled by the treatment of older women on the bodybuilding circuit. "People should understand that as the average age of Australia rises, there's going to be a lot more ladies in their 40s and 50s that are competing," Ms van Dijk said. "I think it's a wonderful thing and we should encourage it. "But when people think they should be healthy and look healthy, and that's not the case - they should be very careful to follow the guidelines for health. "If they do it in a way

Fair Trade: Beyond Barter How do free trade agreements and alternative currencies influence working relationships? A few years back there was much talk about worker rights and fair trade but most job related environmental campaigns were talking about the problems of global warming. Fair Trade and eco-friendly activity seem to go together in the minds of consumers. I'm here to talk about something else, I'm here to talk about the way that global trade and environmental practices are combining to change the way that we view working relationships. I see example after example of free trade producing alternatives for local production. I'm assuming that as the world community becomes more aware of the production chain and the correlation of prices, they will spend more time and effort ensuring that workers receive fair pay for their work. I'm sure that there are industries that don't seek fair trade as valid alternatives, and as a result, end up accepting unfair terms with the motive being tied to a major corporation and not to a concern for trade issues. Also, I don't want to discount off the fact that the effort to making these relationships more viable can be a very expensive venture. Also, let's keep in mind that fair trade has another option. If the value of the cash is not enough to keep the workers fairly employed, then they might choose to either make a choice to travel to another country where fair trade is more prevalent or go back to their own land where they own the land - this can be seen in Bolivia and Nicaragua. The biggest concern however, is that free trade will

provide great opportunity for a massive increase in underground economies. In Brazil, where I come from, most people are employed by only one business, whereas in the US people are employed by many different businesses. In general, in the US there is a lot of outsourcing which is a different issue. It is possible that we could see the number of jobs tripled by 2025 according to the US government.
