SPACEWatch Network Edition Cracked Version 5 is the compact, free edition of the award-winning SPACEWatch Network Edition. It gives you everything you need to make quick decisions about server sprawl, file duplication, inefficiency and shared data. It's quick to install and simple to use. Let it work for you - or work with it to help you make smart decisions. SPACEWatch Network Edition 5 is perfect for home and small business users who want to see what their networks are really holding. It works with Windows, NetWare, UNIX and Linux. SPACEWatch Network Edition 5 comes with 3 workflows, 'file duplication', 'file sharing' and 'unwanted shared folders' to analyse your file servers. SPACEWatch Network Edition 5 includes the 'file duplication' workflow for a complete analysis. You can easily create reports to share with others and use it to find out what your file servers are really holding. SPACEWatch Network Edition 5 is perfect for home and small business users who want to see what their networks are really holding. It works with Windows, NetWare, UNIX and Linux. SPACEWatch Network Edition 5 is ideal for small businesses or within departments of larger organisations. See what SPACEWatch Network Edition 5 can do for you: Find file duplicates with 'file duplication'. Find folder paths that are similar with 'similar folders'. Find similar folders on other file servers with 'folder sharing'. Discover unwanted shared folders with 'unwanted shared folders'. Get rid of the stuff you don't need with 'file/folder purging'. Delete files older than your specified date/time with 'file deletion'. Share files to shareable folders with 'share to folder'. Re-store data that has been lost or accidentally deleted with 'data recovery'. Find the amount of disk space that is available with 'disk space calculator'. Don't buy more disks or new file servers - reduce your spend on storage area networks, archiving and backup. Get back in control with SPACEWatch Network Edition 5. It lets you find and remove file duplicates, other unused and unwanted files and find similar folders across your business --- see all your treesizes and trends from as little as US\$169. It works with Windows, NetWare, UNIX and linux. You can also extend it to Lotus Domino and Exchange. It is easy to use and quick. You can easily create charts

SPACEWatch Network Edition 5 lets you get organized and find file duplicates and other unwanted files on your network - all with ease. SPACEWatch Network Edition 5 lets you get organized. In SPACEWatch, you can quickly identify file duplicates and other unwanted files. The file searches, analysis and conversion tools are easy to use and save you hours of work. SPACEWatch lets you find other similar files and folders across your network. Once you have set up your search, you can even narrow it down to the same version of the same file. SPACEWatch let you find and remove file duplicates, other unused and unwanted files and find similar folders across your business, see all your treesizes and trends from as little as US\$169. It works with Windows, NetWare, UNIX and Linux. You can also extend it to Lotus Domino and Exchange. SPACEWatch is easy to use and quick. SPACEWatch Network Edition 5 was developed by an international team of hardware and software specialists. For us, the project was like the birth of our children - and we will be there to support you until SPACEWatch is at its best. Yes, it does cost more than SPACEWatch or any of the old SPACEWatch products, but SPACEWatch Network Edition 5 is actually a lot cheaper. In fact, SPACEWatch has been proven over 10 years of use by thousands of organisations around the world and is the most popular and complete network storage solution. It is the only network-wide solution that provides automated storage optimization for use with the most popular file servers. SPACEWatch is the product of a series of groundbreaking products that were made available over a decade ago, and in that time it has proven to be completely reliable and easy to use. These new products provide even more functionality, which means SPACEWatch Network Edition 5 will always be the best solution to meet your storage needs. More than a File Server. SPACEWatch has proven itself over a decade of use. It is the only product that provides automated storage optimization. Now comes SPACEWatch Network Edition 5, which includes the latest file server technology and the power of the SPACEWatch file server engine. It is the complete, network-wide solution for managing your file servers, and the only product that provides automatic storage optimization. More than a backup. SPACEWatch Network Edition 5 also provides functions that are perfect for managing archives, storage area networks, and backup. The solution allows you to create formatted reports to share with others and use it to find out what your file servers are really holding. More than a File Server.
