Created by FlyJinX from the ground up, MediEvil: Resurrection is a remake of the original PlayStation classic MediEvil, with a few major twists, and a splash of new exclusive content. Story The evil Queen of MediEvil, Vivienne, has resurrected to take over the world... from hell! With the Resistance reeling from defeat, and seemingly out of ideas, you take up the mantle of hero to kick arse once more. Gameplay From the awful 'zombie combat' of the first game to the frantic platforming of the second, the MediEvil series has been through a lot, so the developers have gone all out with a dynamic, dynamic, modern reboot. For MediEvil: Resurrection, our remake of the original PS1 classic, was a unique challenge. It was the biggest in-game remake we've done, with all the content from the original PlayStation game in the new game, and we had to write a brand new story and script to match. There was also no existing engine to base the game off. Instead, we drew all the art, characters, animation, and a lot of the enemy and level designs from scratch, and created it all from the ground up. The new engine that we're using has allowed us to move away from the 'just a movie' gameplay of the original PlayStation game, and created a full-fledged and fully-realized game from start to finish. The 'new' MediEvil game will be at a global stage release for both iOS and Android devices in 2017, with a PC version to follow shortly afterwards. Gameplay Hearts from across the world have received a timely dose of MediEvil: Resurrection's brand new arsenal of weapons and powers to overthrow the queen of evil, and save the world. Classic combat gameplay is defined by the use of deadly weapons and powers, and the ability to fight a variety of undead enemies. MediEvil: Resurrection's 'classic mode' sees you controlling the sassy princess protagonist on her quest to save the world from evil! There's four classes of enemies you'll encounter, from the tanks to the assassin, and each has their own visual style and two-weapons combination that can be used to take down opponents. The first class of enemies are the giant zombie minions, which can drop their heads and bite, making them 'zombie' enemies to be careful around
