
ScreenPaste Crack Free

ScreenPaste is an application designed to automatically capture screenshots of your desktop and upload them to the Imgur web sharing service. It runs in the system tray and a single click is required for the tool to grab a picture of your screen and upload it within seconds. Each time a task is performed, users are notified through a short message displayed at the bottom of the screen. By clicking the notification window, the link to the image instantly opens in your default browser. Along with uploading the images to Imgur, the application saves a local copy of them. You can view stored items by opening the screenshots folder from the main menu. Moreover, you have the possibility to copy the picture's URL to clipboard. Although ScreenPaste provides users with an easy to use method to share screenshots via an image hosting website, compared to other application in its category, it does not offer functions such as grabbing screen areas, saving images to various formats or defining hotkeys for performing certain actions. ScreenPaste saves the output to the JPG format only. The main advantage of the application is its ease of use. It runs practically unnoticed in the system tray and you can quickly access it in order to instantly share a picture of your desktop on the Internet. You can also set the tool to launch automatically on system start. All in all, ScreenPaste is a utility that serves its main purpose in a fast and efficient way, allowing users to easily upload screen snapshots at any convenient time. Download GoMES 2.8.3 free software from Softonic: 100% safe and virus free. GoMES is a freeware program that lets you manage your messages with ease. With a click of a button, you can create a new folder, create an e-mail message, edit or delete an existing message, edit or delete a contact or even create a new contact.
