What's New in the?

- Provides optional Twitch "live" camera extension that allows broadcasters to leverage Snap's livestreaming capabilities to use Snap's Lenses - Applies Lenses during broadcast and offers the ability to record/keep the recordings - Available for iOS and Android - Lenses can easily be saved for later use and synced between devices - User can also tag the live broadcast and Lenses to share with others - Discover Live, which allows a user to easily search for live streams from any channel - Users can also view recent streams - Discover Now, which allows viewers to instantly view user's recent broadcasts - Discover Replay, which allows broadcast viewer to watch recent broadcasts with the broadcaster - Instant Replay, which allows stream to pause the playback and allow user to save it for later - Explore Replay, which allows viewers to explore broadcast moments before they replay them - Direct Access, which allows broadcasters to disable the pop up viewer when accessing SnapCam - Supports SnapChat version 8.1 or higher - No ads, no in-app purchases - Compatible with iOS 9 or later, Android 4.4 or higher Create your first ultrarealistic looking Snapchat lens or whatever you want. This is the most popular feature of Snapchat Lenses. Make yourself look like a superhero, dog or whatever you want. In this tutorial we will show how to make a simple blue lens that appears to be floating. First, you need to download all the resources from In the main project folder you will see the snap-template json with all the configuration you need. You can also add more Lenses with the package json. Create the class for your lens and expose the methods that generate the UI (animation, color, etc.) The code is very simple and you will need to import the package 'import {Component, lazy, ViewChild} from '@angular/core'; Create the following class to see the sample code: 'export class MyLensClass { constructor() { this.snp = Lenses.init(); } showSnap() { this.snp.go("/"); } showInside() { this.snp.go("/inside"); @Component({ selector: 'lens-container', moduleId: module.id, template

System Requirements:

● Windows 10 or Windows 8.1 (64-bit OS required) ● AMD Athlon 2000+ or Intel Pentium 4 or better ● 2 GB RAM minimum ● Direct X 11 compatible video card (ex. NVIDIA® GeForce 7800 GTX+) ● DirectX Compatible Required Hardware: ● AMD Radeon® HD 7870 / NVIDIA® GeForce GTX 760 1GB RAM minimum Recommended Hardware: ● AMD Radeon® R9 280X 3GB RAM minimum ● AMD Radeon®
