Since 1.1.0.0, I've made a few more improvements - If you're on 1.1.0.0 or higher, then you'll see more now. If you're on 1.0.5.2 or lower, then you'll have to relog. If you're using the Steam Shutoff HUD, then you can close it via the Settings.txt file. If you don't, then you will need to disable the chat sounds in the "Audio" tab, or the Steam Shutoff HUD will turn them on automatically, and that breaks something. - Discord - - Here at Masstech, we're constantly working to make modding easier. The Players Upload uploaded a system-hosted skin pack called Worms Battlegrounds (link in description) for Steam. How To Install and Crack Vacant Planet:

- **Select "Extract zip to desktop"**
- **Run the game from their folder**
- **Open a folder with DVD-Roms and crack executable with a Hex-Editor and Open "silent.exe" (usually last) in it**
- **If crack file is not right and you see nothing in a window, check if you are using a good emulator for your system**
- **Actually if you tried a crack and nothing happened (or you're using a very old version of Broken Ties), you may have to change your video settings (I suggest to use 10 FPS if you're on a desktop).**

Uninstalling the game

- **delete the whole game dir first**
- **delete Silent even in case there were crack files**
- **Then remove the game launcher from your desktop. Afterwards you're able to delete the directories Silent left behind and you can close the game. Unfortunately Silent won't show up if you try to relaunch the game in order to remove Silent left behind. But if you haven't unpacked the zip file, you're able to start the game from their directory.**
- **If you have steam installed, you can go to Games and open the game to be sure that everything is done**
- **If you only copy your savegames, you can also go to File > Save (instead of the short cut it appears in the launcher for installing the first time) and they will remain untouched.**
