Learn about the new Google Insights features that let you tailor search results to your customers. Learn how Google Insights can help you protect your business. See how Google Mobile Explorer helps you measure the impact of your apps on smartphone users. In the new version of the search engine, Google has fixed a number of bugs, simplified the interface, and added several new features. What's changed The search engine home page now displays an index. This is a list of all indexed pages, for example, in the "News" section displays the news that users found In addition to textual information, search results display links to images, video and audio files, so that the user can quickly go to them. Yandex will also display a "All news" button, which can be used to quickly go to the page. If a user enters a query in a certain language, he will get a list in that language. In addition, there is a panel "Recommendations", where the most popular news of the day appear. They do not include news that users have chosen themselves. Users can customize the display of this panel, which will allow them to see only the most interesting news for them. "Yandex" began to show users "useful" news. In the news feed recommendations based on the preferences of users have been added. About this informs the press-service of "Yandex". In the tape entered the news, which may be interested in users. "Yandex" notes that it can be not only political news, but all in which users may be interested.
