This game uses Epic's The Matrix Awaken's Project City and replaces the character with a flying superhero variant of my own design using other marketplace assets. This was a quick thrown together test, there could be any number of issues and problems, but I am putting it out there for anyone who is keen to give it a go. Also, for legal reasons, this character isn't Superman and I have made sure this is totally free. Published on Reddit, the post was made by the creator of the demo, TATOMICA. While the actual snippet of footage is very brief, it shows off Superman jogging across a rooftop in what appears to be a recreation of Manhattan. The classically designed superhero then jumps off the building and zips into the sky at what appears to be a blistering speed.
