We've been using Sketch as a graphics tool for the past months and we're impressed by its speed, the quality of the illustrations, and the ease of use it offers. Using its native Ink feature, you can sketch just about anything you can imagine, in pen on paper or in your favorite drawing or sketching app. After using Sketch for a while, you'll have data about the type of work you're generating, where and when you're doing it, how long it takes you, and what you're spending. If you'd like simple, elegant graphics in the $3 package, you'd be seriously limited using a high-end PC, but the iPad paints a beautiful and fast picture. After testing the iPad Pro 11-inch with the Apple Pencil, you'll be able to sketch and edit just about anything you can think of, from straight and thin lines to wavy and organic ones. But whatever document you're working on, you can sketch anything within a few strokes. You can use your Wacom stylus to draw, edit, rotate, zoom in, and edit your illustrations. If you need to sharpen your pencils, you can invest in an $80 Wacom Pen Tablet Kit, which includes the stylus and a quick start guide to getting Sketch going. If you're looking for a quick and easy way to draw and edit Graphics, consider Adobe Sketch. Adobe Sketch for iPad is $3.99, and if you're looking for something that just makes sophisticated graphics seem like a natural fit, Adobe Photoshop Sketch for iPad is $9.99. It's a little pricier than competitors (which include NewDraw Pro for iPad, Vivante Sketch for iPad, and Procreate), but it's packed with everything you need to unleash your inner artist's creativity.

But why should you care about a bunch of lists? Basically, it's pretty much the opposite of a Top 10 list. Why? Basically you kind of want to know more than just a list of what it does, right? And this list will let you know a little bit more than a simple list of tools would. Brush and roller tools, including Smart tools, are available in Adobe Photoshop. Smart tools are specific tools that work on a specific color. For example, replace a color orange with the color green with the Convert to Green brush. **What It Does:** The Levels tool is what makes Photoshop a great photo manipulation software. Levels allows you to selectively adjust the brightness or the contrast of each channel in a picture. With a dull, washed out image, levels can bring back the image's details and eliminate any unwanted effects. You can also use levels to create image mock ups for designers. You can use the Levels tool to quickly adjust the brightness or contrast of the tools in a photo. The levels tools are tucked away in Lighting and Curves and typically aren't taught out of the book. 933d7f57e6

In this cheat sheet, we will list out the best tools that are currently available in the market. Selective Color Mask is the perfect tool that allows you to quickly and easily remove areas of your image that aren't in your current

color scheme. This tool comes in handy for when you're using color in a design but you're still in the early stages of your design process. Color Profiling One of the most popular feature that draws designers frequently is the color profiler. In Photoshop, It allows you to choose one color and make color variations of that color. The Color Profiler option helps in finding the best property for the selected color and color variations. When you apply the color variation, the tool predicts the outcome and the changes in the image. Thus, you know the best variations of color you can choose for your design. Color Variations Another feature that is as popular as the color profiler is the color variations. With the use of the color variations tool, you can copy and paste a color from another area. As it is the copy-paste technique, you have to select the area from where you want to copy the color and then wish to copy the color in the same outline. Once the color is copied, you can make variations of that color by clicking on the color area and choose a color in the variations tool. Thus, you can choose the best shade for the selected color. You can also change the color of the selected color by clicking on the color area.
