you can't install these programs on Playstation
3s. Sony rarely approves them on their forum.
So If you want to "hack" PS3s I suggest you to

get an Xbox 360 and install there the programs from here:

[url]<http://www.xbox360hacks.net>[/url] which you can also find here: [url]<http://www.geocities.com/floridafreedom/plays3.html>[/url] and you will get those programs with less time, cause these xbox360 mods are released more often than the ps3 ones. and BTW all those homebrew programs run with hundreds of MB RAM memory and your PS3 won't have them. You have to use PSPs (which is on retail too) or your laptop. PS3 Partitions and Firmware On/Off codes tutorial - Part I: Downloading, Installing and Testing Of course it's possible to split your flash memory into two parts in the filesystem. The first part will be your console. It will have two file types: boot.vsh and c7sk64.bin. c7sk64.bin is the console, boot.vsh is what is used when you select "start the console" from the XMB menu. The second part will be your SD card (a plugin). After these two parts you can replace the console's HDD with a new drive or put the console into standby mode without booting into the console. In this tutorial I will show you how to download an image of the official PS3 firmware and how to install it to your flash

memory. First of all you need to download the image on your PS3. Because the official firmware installer is encrypted, you can't just dump the file to your flash memory. You have to write it to the disk first. Open XMB, select "Settings", "System Settings" and "Disk settings". It will open a window where you can select which disc you want to use for installing the firmware. I suggest you choose the most recent one, which is EEC. Click "Ok" then "okay". The disc will be ejected and you will see a message telling you that you have to insert the disc in your PS3 to install the firmware. Insert the disc into your PS3, reboot and hold down "Start" when you get to the XMB. You will see a list of partitions on your disc. Choose "PS3" (2nd parttion) and "EEC". You can now choose "Yes" to overwrite the "PS3" partition. 5ec8ef588b
