Pricing The first version of AutoCAD Free Download was released in 1991 for the price of US\$3,500 (). For comparison, the total cost of a comparable business use license for AutoCAD today is US\$19,200 (). AutoCAD LT began as a low-cost version of AutoCAD, offering different, more limited functionality at a lower price. However, after version 2000, AutoCAD LT was no longer sold.

History

Prehistory The first generations of CAD (Computer Aided Design) tools were simple drafting applications that were used on mainframe or minicomputers. Early history AutoCAD was created by H. Philip Marx of Autodesk in 1990. The original design was based on the functionality of the Drafting & Annotation Software Suite, which Autodesk developed in the early 1980s as the base for Revit. Autodesk CEO John Walker created the new company after leaving Inscap Software in 1985. The first beta version was released to AutoDesk employees in October 1990. Interest in the product was high, and Autodesk hired an international sales force within a few months.

1995 In 1995, Autodesk released AutoCAD 95, initially priced at \$5,995 (). It introduced the concept of flexible design templates, that allow for the creation of all drawings, saving time and money. AutoCAD 95 allowed for the first time the drag and drop of components (shapes) and assemblies (elements) on the drawing canvas. The system also introduced the first CAD-like user interface: right click on the screen and there were options to: select the layer, set its transparency, highlight or mask parts of the drawing (objects). The ability to generate a 3D model of the drawing was also added. The new design templates were based on the "Huge" format, which was later replaced by the more standard "Studio" design template format.

1998 In 1998, Autodesk released AutoCAD LT 1998, which was priced at \$2,495 (). AutoCAD LT, and the later release of AutoCAD 2000, were developed in C++ and AutoLISP. AutoCAD LT 1998 was built on the same technology as the original AutoCAD 95.

2000 AutoCAD 2000, released in 2000, was a major update, offering many new features, including web and graphic design support and improvements af5dca3d97
