Out of the Blue is the fifth studio album by American rock band The Doobie Brothers, released in 1979. Out of the Blue is the first Doobie Brothers album to feature synthesizers, percussion and other electronic instruments rather than organ and piano, which the band had been using since the release of their 1977 album Takin' it Easy. It was the last Doobie Brothers album to feature singer Tom Johnston, as well as the last with drummer John Hartman. (Former drummer Gary Wright was the band's singer from 1979 to 1983.) It was also the only Doobie Brothers album to feature saxophone player Tom Johnston, who played on almost every track. It was also the last Doobie Brothers studio album to be produced by Tom Dowd, who worked on the band's five previous

studio albums. The album had a similar sound to the band's previous album, *Takin' it Easy*, but was also more diverse, with a marked departure from the band's previous sound and a more theatrical feel. The album was the band's first to feature prominent use of synthesizers and drums in the mix; the synthesizer and drum sounds were designed by Tom Dowd. Like the group's previous album, *Takin' it Easy*, *Out of the Blue* includes a country number called "Out of the Blue" (which was written and played by bassist John McFee), as well as a funk song called "Funky Town". Some of the album's songs were performed with a horn section, but the songs were not dedicated specifically to a particular band member, whereas the songs on *Takin' it Easy* were dedicated to members individually, and were performed with a band featuring the same members as the band. Two songs on the album, "Unsinkable Molly Brown" and "Wave", were written by Curtis Mayfield. The latter song won the 11th Annual Grammy Award for Song of the Year in the same year, thus breaking a record previously held by the group. In 1999, *Out of the Blue* was ranked number 132 on *Rock Years'* list of the 500 greatest albums of all time. Track listing Personnel c6a93da74d
