Discover the growing collection of high quality Most Relevant XXX movies .After bedside operation is completed in a hospital, the operating area must be maintained clean and sterilized to prevent infection of the operation site. The operating area includes an instrument tray, which supports a variety of instruments used to perform the surgery. An instrument tray must be cleaned thoroughly to remove blood, bacteria, and other contaminating material that could infect the patient. It is desirable that a hospital maintain its instrument trays clean and sterile. To be sure that an instrument tray is clean and sterile, hospitals often discard a used instrument tray after the surgery in which it is used is completed. Thus, f988f36e3a
