The latest iteration of the game, also known as CS:GO, is Counter Strike: Global Offensive. Counter-Strike is the kind of game you look at and say, "I wish I had come up with that...". It's a tournament mode, with each match being a best of five. Since the experience of the game isn't the same as the other games, you may enjoy the game if you're looking for something like the FPS games. Counter-Strike is a team game. It's also fairly simple and straightforward, but it's fun nonetheless. The sounds, music and graphics are also great in this game. The game offers a multiplayer of every type, from deathmatch to huds. Counter-Strike is not too difficult in a normal setting. The difficulty mostly comes from the fact that more than half of the weapons can be used and some of the maps can be extremely confusing. There are also a lot of players from all over the world, so you can meet with new and different people. Counter-Strike is one of the most popular multiplayer games, and it's not hard to see why. In Counter-Strike, the player is in control of an agent who tries to get to his end-point. The agent has to use the environment, teammates, and enemies to get to his end-point. The game has single player vs. humans, as well as a competitive multiplayer mode that allows you to be able to play against the A.I. There are a lot of game types, each with a different style of play. I haven't tried all of them, but the two that I've played are Backpack, an exercise in patience, and Counter-Strike, which is about confidence and efficiency. Thankfully CS:GO is pretty easy to learn. There's only a very small amount of different types of weapons. Because of this, once you get the hang of how they work, and which classes they are for, you'll be able to pretty quickly build a decent loadout and kill anyone. It has a very simple play style and a very simple ranking system. They've also got the CS:GO servers up and running, so there's no lag. If you're looking for a simple competitive game that doesn't take too long to master, then Counter-Strike: GO is worth a look. Sec8ef588b
