Bugs There was a problem with the way smile-in searched the webcam, so sometimes it didn't recognize your face from the camera. Smile-in didn't seem to pick up my face at first. When I tried two different ways to install it it worked for me. No support for smile-inPlease remove the product Descriptions: Smile-In is a Face Recognition/Logon Tool for Windows. It uses the webcam of the user to log in to Windows. It keeps the face you enrolled in Smile-In as your password, so you don't have to remember a password. It automatically detects your webcam and searches for your enrolled face. If you want to log in using your face, then your enrolled face is a password to the computer. You could join the software to your Windows account as a trusted, special guest, because it can detect and log you in from the webcam of your PC. The software automatically sends your webcam to another one with your enrolled face, and you can watch the image on your PC or browser. The live face detection prevents any others from logging in from your webcam. You can freely download and transfer any image files from the PC. (eg: Images, screens, etc.) You can freely download and transfer any executable files from the PC. (eg: Video, music, etc.) You can freely download any setup files from the PC. (eg: Self-updating, etc.) It has a nice user-friendly interface. It allows you to select the language of the program. Smile-In is built with a high level of integration and precision, so you can always be sure that the program will work.
