## Solidsquadsolidworks

Solidsquadsolidworks provides more than 150 finished solidsquads - custom masks, baked shapes, sculpted objects and more. It also includes about 50 additional tools - brushes, papers, textures etc. Plus the solidworks project files for customization. Either let solidquadsolidworks know about a model first. You can do that by asking a question on the Github project page. Or you can add C:/solidsquadsolidworks folder to your PATH in user environment variable. Then you can use it on PowerShell by running solidquadsolidworks. This is a basic example of a solid that has been vectorized in Solidworks. This solid is the base for any model that has solids (to cut it) or extrusions (to extrude it). \basename  
solidworks \setfile{solidworks.slds}

\renewcommand{\basename}{solidsquadsolidworks} \*Solidworks has a script that creates this dataset. It is in a C:\temp directory and is called'solidworks.slds'. If you want to make a new solid just create a new file and give it the same name as the model you want.

\basename#1\temp\%1.slds \basename#1\temp\%1.slds~  
\basename#1\temp\%1.slds \basename#1\temp\%1.slds Pick any one of these and try to make a model. It should look like this:

```
\setfile{solidworks.slds}
\renewcommand{\basename}{solidsquadsolidworks}
\basename#1\temp\%1.slds
\renewcommand{\basename}{solidsquadsolidworks}
\basename#1\temp\%1.slds~
\renewcommand{\basename}{solidsquadsolidworks}
\basename#1\temp\%1.slds~
\renewcommand{\basename}{solidsquadsolidworks}
```

solidsquadsolidworks (previously called solidworks4d) is a free open-source 3d modeling, rendering, and animation tool for solidworks. solidsquadsolidworks is available for windows, mac os x, and linux.
