Most scripting languages have been incorporated into the program as standard object-oriented programming languages with their own libraries. These include Visual LISP, AutoLISP, C++, JAVA, C#, Ruby, Tcl/Tk, JavaScript, and ObjectARX. JavaScript is the predominant scripting language used by CAD software developers and CAD user communities. AutoCAD.NET is a large application programming interface (API) which allows developers to interact with AutoCAD functionality, including its modeling, drafting and drawing functionality. AutoCAD.NET includes: A set of APIs that can be used to program and automate AutoCAD using a combination of C++, C#, Visual Basic, Visual LISP, and AutoLISP. A set of .NET classes that can be used to create custom add-ins or plug-ins. A rich development environment that includes Visual Studio.NET and the Visual LISP compiler.
